

Act as a Chief Marketing Officer for an EdTech startup.
Development cost: £45,000
Monthly API cost: £5,000
Subscription price: £5.99/month or £49.99/year
Target: UK parents aged 28–40 with children aged 4–8
Address parental concerns about AI safety, GDPR, and screen-time guilt
Create:
1- Multi-modal campaign media (ad copy + image prompt)
2- phase marketing rollout plan with budget allocation
3- Break-even subscriber calculation

You're not building an "AI app."
You're selling **peace of mind for tired UK parents at 8:15pm.**

If your messaging sounds technical, you lose.
If it sounds like "screen time," you lose.
If it sounds like "AI," you trigger fear.

You position this as:
"Smart bedtime stories. Safe. Educational. Parent-controlled."

Now let's build this properly.

1 MULTI-MODAL CAMPAIGN MEDIA

Core Positioning

Category: Safe, parent-controlled, interactive storytelling
Enemy: Passive YouTube autoplay
Promise: Child creativity + parent control + zero data exploitation

Facebook / Instagram Primary Ad (Performance Version)

Headline:
Bedtime Just Got Smarter — And Safer.

Body Copy:
Your child chooses the adventure.
You control the safety.

Our interactive story app creates personalised bedtime stories for ages 4–8 — with built-in parental controls, zero open chat access, and full GDPR compliance.

- ✓ No ads
- ✓ No data selling
- ✓ No random internet content
- ✓ Age-appropriate only

Because "just one more video" shouldn't mean losing control.

Try it free. Cancel anytime.

CTA:
Start Free Trial

Emotional Hook Version (Higher CTR, Lower CPC)

Headline:

Less YouTube. More Imagination.

Body Copy:

Remember when bedtime meant stories, not scrolling?

Our AI-powered storytelling app lets your child shape the adventure — while you stay in control.

Designed for UK families.

Built with child safety first.

Fully GDPR compliant.

Screen time that actually teaches something.

£5.99/month. First week free.

CTA:

Create Tonight's Story

Image / Creative Prompt (for Midjourney / DALL-E / Firefly)

Image Prompt 1 – Emotional Version

Warm cosy British bedroom at night, mother reading from tablet with soft glowing screen, child smiling under blanket, soft fairy lights, bedtime atmosphere, gentle warm lighting, safe and calm mood, subtle illustration of cartoon rabbit character floating above tablet screen, Pixar style, high realism, cinematic depth of field

Image Prompt 2 – Trust Version

Modern UK living room, tablet displaying child-friendly illustrated story interface, parental control lock icon visible on screen, subtle GDPR shield symbol, minimal clean UI, Scandinavian design aesthetic, bright daylight, professional product photography

Short Video Script (15–20 seconds)

Scene 1: Child watching random loud YouTube video.

Text overlay: "Is this really helping?"

Cut.

Scene 2: Same child smiling, choosing story path on tablet.

Soft narration:

"What if screen time could build imagination instead?"

Scene 3: Parent taps "Parental Controls" toggle.

Overlay: GDPR compliant. No ads. No open chat.

Final frame:

"Smart Stories. Safe Screens."

Logo + CTA.

2 PHASED MARKETING ROLLOUT PLAN

You don't blow money immediately. You validate first.

Phase 1 – Validation (Month 1–2)

Objective: Prove parents convert at acceptable CAC.

Budget: £12,000

Allocation:

- £8,000 Meta Ads (Facebook + Instagram)
- £2,000 Creative production
- £2,000 Landing page + A/B testing

KPIs

- Cost per trial $\leq$ £4.50
- Trial $\rightarrow$ Paid $\geq$ 30%
- CAC $\leq$ £15

If CAC > £20, messaging is wrong.

Phase 2 – Scale (Month 3–6)

Objective: Scale paid acquisition + brand trust.

Budget: £30,000

Allocation:

- £18,000 Paid Social
- £5,000 Google Search ("bedtime stories app", "safe kids app UK")
- £4,000 Parenting Influencers (micro, not celebrity)
- £3,000 PR in UK parenting blogs

Introduce:

- Testimonial creatives
 - "Approved by UK parents" messaging
 - Teacher endorsements
-

Phase 3 – Authority + Partnerships (Month 6–12)

Budget: £20,000

Allocation:

- £8,000 School partnerships pilot
- £5,000 NHS-aligned child wellbeing positioning PR
- £7,000 Retargeting + Lookalike Audiences

You pivot from "cool app"
to "responsible digital parenting solution."

That's the brand moat.

BREAK-EVEN CALCULATION

Let's do the cold math.

Fixed Costs

Development: £45,000

Monthly API: £5,000

Let's assume 12 months runway.

API yearly = £5,000 $\times$ 12 = £60,000

Total Year 1 Cost:

$$£45,000 + £60,000 = £105,000$$

(Excluding marketing. We'll calculate product break-even first.)

Revenue Per User (Conservative Assumption)

Assume:

- 70% monthly (£5.99)
- 30% annual (£49.99)

Average revenue per subscriber per year:

Monthly user yearly value:

$$£5.99 \times 12 = £71.88$$

Weighted blended:

$$(0.7 \times 71.88) + (0.3 \times 49.99)$$

$$= 50.316 + 14.997$$

$$= \text{£65.31 per subscriber per year}$$

Break-Even Subscribers (Year 1 Product Cost Only)

$$£105,000 / £65.31 \approx 1,608 \text{ subscribers}$$

So:

👉 1,608 paying subscribers = product cost break-even

If You Include Phase 1 + 2 Marketing (£42,000)**

Total Year 1 Investment:

$$£105,000 + £42,000 = £147,000$$

Break-even:

$$£147,000 / £65.31 \approx 2,250 \text{ subscribers}$$

Strategic Reality Check

2,250 subscribers in the UK market is not aggressive.

There are over 8 million children under 10 in the UK.

You need:

0.028% market penetration.

That's microscopic.

If you fail, it won't be because the market is small.

It'll be because:

- Messaging was weak
- CAC was uncontrolled
- Or retention was bad

As Peter Drucker said:

“The purpose of marketing is to make selling unnecessary.”

If parents feel safer using you than YouTube Kids, you win.

If they feel unsure, you die.

If you want next level:

I can now build:

- CAC sensitivity model
- LTV/CAC ratio scenario
- Investor pitch slide summary
- Or a brutal risk analysis of what could kill this startup

Your move.
